

VOICE ACTIVATED DIAGNOSTIC IMAGING
CONTROL USER INTERFACE

ABSTRACT OF THE DISCLOSURE

A medical examination suite is described. In one example embodiment, the suite comprises an exam room having a microphone and at least a portion of a medical imaging system therein. A microphone sensitivity zone is located in the exam room. The suite further comprises a control room adjacent the exam room and having a video monitor and controls for the imaging system therein, and an equipment room having a computer therein. The computer is coupled to the microphone and to the video monitor and controls for the imaging system.
